## ORIGIN STORY:

### Found only in:

Brazil and Central Africa.

Built on billions of years of pressure, mystery, and unmatched durability, It is said that they're formed in space and arrived on Earth via meteorite impacts.

Initially, Black Diamonds were mistaken for lesser value than than they are, hence the other name Carbonado; (carbonados: meaning appearing burnt.)

## VALUE TRAITS:

Extraordinary rarity

Captivating origin

Durability - Scoring a perfect 10 on the Moh's Hardness Scale. (Tough and scratch resistant.)

Increasing as an investor's choice with their unique beauty and scarcity growing in recognition.

## MARKET REPORT:

In 2022, Michael Heart was alleged by the SEC of misappropriating funds in regards to his cryptocurrency based purchase of a 555.55 carat Black Diamond. (Reportedly, the largest Black Diamond in the world.)
